## Wheels, part of Helbiz, Completes Integration with Google

November 29, 2022

*Integration Enables Users to Locate Wheels' Electric Vehicles Within the Google Maps App Globally*

NEW YORK--(BUSINESS WIRE)--Nov. 29, 2022-- Wheels, a Helbiz Inc. (NASDAQ: HLBZ) company and a California-based leader in micro-mobility, today announced the completion of its fleet of electric vehicles being integrated and operating within Google Maps. This expands the current partnership with Google where at their campuses their employees receive access to Wheels vehicles as a corporate benefit.

This press release features multimedia. View the full release here: <https://www.businesswire.com/news/home/20221129005698/en/>

Through this integration, Wheels' unique sit-down scooters will appear on the map with the approximate price, estimated trip duration and optimized route to the traveler's desired destination. After selecting this method of transportation, riders will be redirected to the Wheels app to start their ride. This feature is available in all cities that Wheels currently operates in and will expand into each new market the company enters moving forward.

This collaboration further supports Wheels' commitment to providing its accessible, alternative mode of transportation to local communities. By using Google Maps, users worldwide will be able to find a nearby vehicle to quickly meet their first and last-mile needs, while also reducing traffic and pollution.

"We are thrilled to begin this collaboration with Google Maps that offers easy access to our efficient and sustainable transportation options, expanding on the current Helbiz integration," said Helbiz CEO Salvatore Palella. "This will make it easier for Google Maps users to incorporate shared electric vehicles into their daily commute and plan multimodal journeys. It also serves as an important milestone in our mission to ensure smart cities are rooted in green mobility initiatives and brings Helbiz and Wheels closer together in offerings."
